NGL STORAGE SOLUTIONS

## Modular NGL Storage Skids

- Scalable Solutions
- Rapid Deployment
- Minimal Field Service

Fully integrated piping per ASME B31.3 and optional pump, metering & controls. Separate truck loading skid available that can be placed where you need it.

## Flexible Systems - Expand as Needed

Our modular NGL storage systems are the ideal solution for intermediate liquids storage needs at the wellhead—as well as any other temporary or short-term NGL storage needs where scalability is desired.

Modular NGL storage units are built off-site under ideal conditions for rapid deployment and minimal field service—reducing your costs by as much as 75% or more.

Multi-unit compatibility is built into every skid we deliver, providing the ultimate flexibility for you to ramp up—or ramp down your operations as needed.

Contact us today for fast-ship, standard configurations—or let us custom design and fabricate NGL storage units to your exact specifications.

- Optional Integrated Liquid Pump
- Optional Electronic Controls & Metering
- Truck Loading Skid
- All Valving NFPA 58, API 2510 Compliant

## Rapid Deployment, Minimal Field Service

Optional field erected platforms with safety cages provide functionality for loading, liquids sampling, maintenance.

We use only ASME certified, National Board registered storage vessels fabricated in the controlled environment of our state-of-the-art manufacturing facility.
