

Prefabricated, Ready-to-Assemble Bulk Storage Tank Systems

Save time - and money - by ordering our fast-ship, pre-built liquid storage systems. Simply choose your tanks, select your loading/unloading option, and specify any additional equipment you need. **We'll take care of the rest.**

Your modular bulk plant arrives with everything you need including all piping, valving and instrumentation, loading/unloading equipment, and any other additions you specify such as metering, pump, compressor, vaporizer and more.

You'll also receive detailed technical drawings and easy-to-follow assembly instructions - all designed to the latest NFPA 58 standards. Save even more time by letting our experienced field professionals build your modular bulk plant for you. **Contact us to learn more!**

1 Choose Your Storage Tanks

We offer the broadest selection of new and used storage vessels up to 120,000 gallons. Not the right fit? Let us custom fabricate vessels to your exact specifications.

2 Select Loading /Unloading

Choose bulkhead for cargo tank/transport truck and bobtail loading/unloading or select an unloading tower for railcar operations. Or add both options.

3 Add Optional Equipment

Specify optional liquid transfer pump, electronic controls and metering, vaporization systems, pneumatically controlled emergency shutoff valves (ESVs), compressor, and more.

Receive everything you need to assemble your plant on-site - fast.

Backed by more than fifty years of experience serving upstream, midstream and downstream oil and gas markets, TransTech Energy is a leading supplier of modular NGL and LPG storage and transfer solutions—with a track record of delivering safe, reliable systems.
